Federal and Estimated State and Local Revenues and Expenditures for General Government, Fiscal Year 1938

Total 1938 Transactions

During the fiscal year 1938 combined Federal and estimated State and local expenditures for general government, exclusive of debt retirement, amounted to \$17,470,000,000.¹ Of this total, \$1,005,000,000 consisted of net additions to social security reserves. The Federal Government accounted for \$7,626,000,000, state governments for \$4,223,000,000 and local governments for \$5,621,000,000 of expenditures. Inclusive of debt retirement, total general governmental disbursements aggregated \$18,199,000,000.

To pay for all general governmental disbursements, taxes are estimated to have furnished \$14,811,000,000, non-tax revenues \$1,181,000,000, borrowings \$1,869,000,000 and reductions in general fund balances \$338,000,000. Of the total \$15,992,000,000 revenue, the Federal Government collected \$6,242,000,000, the states collected \$4,202,000,000 and local governments \$5,548,000,000. These and the corresponding data for fiscal year 1932 are presented in Table 1.

¹The term "general government" as here employed excludes trust and investment fund operations, public utilities and other public service enterprises, unless these activities incurred deficits paid from general governmental funds. In such cases the amount of the deficits is included with and reported as a general governmental expenditure.

Sources of Tax Revenue

It is estimated that total Federal, state and local tax collections in the fiscal year 1938 amounted to \$14,811,000,000. This represented \$114.09 per capita and amounted to 21.8 percent of the average of the estimated national income for calendar years 1937 and 1938.

The most important single source of tax revenue in the United States is the property tax. In 1938 this tax is estimated to have produced \$4,745,000,000, not including special assessments. Taxes on corporate income and corporate privilege and taxes on personal income were the next largest revenue producers. The corporation taxes, which included the net income, the capital stock and other corporate franchise taxes, produced \$1,762,000,000. The individual income tax yielded \$1,562,000,000. Automotive taxes, the liquor-tobacco group and taxes on payrolls each produced close to \$1,500,000,000.

For the Federal Government, the three most important sources of current revenue were the taxes on corporation income and privilege, on individual income, and on liquor and tobacco. Collections in 1938 from each of these three sources exceeded

a billion dollars. For state governments, the automotive taxes were by far the most important. In 1938 this group, including motor fuel taxes, motor vehicle registration fees, and drivers' licenses (excluding the personal property taxes on automobiles) yielded a total of \$1,163,000,000. Next in importance was the sales and other excise group, which produced \$717,000,000. In addition to the general sales taxes, this category includes the special taxes on amusements, soft drinks, utilities, oleomargarine, chain stores, severance of natural resources, stock transfers, as well as a large variety of business licenses. The predominant source of local revenue is the property tax. In 1938 this tax yielded \$4,531,000,000. Occasional local general sales taxes and widely utilized local licenses yielded an estimated revenue of \$302,000,000.

The extent to which the various tax sources were utilized by the Federal, state and local governments during the fiscal year 1938 is summarized in Table 2.

Purposes of Expenditures²

Some public funds are twice disbursed, once in the form of grants or loans to other governmental units and again by the receiving units for specific governmental functions. In fewer instances, the same funds are disbursed three times. To avoid multiple counting, the expenditure data for fiscal year 1938 are here shown on

²The classification of expenditures here used varies from and is not as detailed as classifications employed in the reports of the Bureau of the Census and elsewhere. The difference are necessitated by the inadequacy of the data available for estimating purposes. The class "all other" comprises the aggregate of all the unclassified expenditures.

two bases. (See Table 3.) The first includes expenditures from the various governments' own sources and, therefore, does not include those expenditures which were financed from sums received from other units in the form of grants, loans, or shared taxes. Transfers to other units are counted as expenditures of the granting or lending unit. The alternative grouping of expenditures reports the various governments' expenditures for their own functions without regard to the origin of the funds. It, therefore, excludes all funds not spent directly but transferred to other units in the form of grants, loans, or shared taxes. The combined totals for all governments are, of course, identical under the two classifications.

The most important expenditure category for all American governments in the fiscal year 1938 was relief, welfare, and social security. It accounted for an estimated \$3,085,000,000. This includes funds expended for work relief programs which in part were devoted to highways, public buildings, and other functional purposes. Net additions to social security reserves amounted to an additional \$1,005,000,000. Next in importance came education, highways and streets, interest, and national defense, including payments toward veterans and their dependents. The Federal Government's expenditures from its own sources (not including debt retirement) amounted to \$7,626,000,000. The corresponding estimated state and local totals respectively were \$4,223,000,000 and \$5,621,000,000.³

³The term "debt retirement," as here used, refers not to the principal value of bonds canceled or paid off but to the budgetary payments into sinking funds and for retirements of serial bonds and notes with a maturity in excess of one year.

In the case of the Federal Government, the most important single expenditure was for relief, welfare and social security. The largest state expenditure was for highways, while the largest single local expenditure was for education.

In 1938, an estimated \$2,237,000,000 was transferred among the various public divisions. For the sake of brevity, these transfers are termed "grants," although they include, in addition to grants, state-administered taxes shared with local units and Federal loans. It should be specifically noted that Federal relief and recovery expenditures for work relief programs under the Works Progress Administration are considered direct Federal expenditures and not grants. These sums were disbursed directly by the Federal Government without clearance through state and local treasuries.

Federal expenditures in the form of grants to state governments amounted to \$633,000,000; those to local governments amounted to \$172,000,000.

The bulk of these totals was accounted for by grants for education, highways, and public welfare purposes. State transfers to local units, mostly for these same purposes are estimated to have amounted to \$1,400,000,000. Local payments to states, comprising sums advanced locally for state highway construction and state public assistance programs, amounted to \$32,000,000.

In view of the numerous transfers from the Federal Government to state and local governments and from state governments to local governments, the division of total governmental expenditures among the three governmental levels, after adjustment for these transfers, differs substantially from the division on the basis of expenditures from the various governments' own sources. In 1938, after adjustment for intergovernmental transfers, local expenditures were more than twice as large as state expenditures and exceeded Federal expenditures by approximately \$300,000,000. (For the details see Table 3.)

Note on sources utilized: The sources of information utilized included published reports of the United States Government, unpublished data from Federal departments administering grants to states and localities, published and unpublished reports of Federal research agencies, and reports of private research agencies.

The statistics of Federal receipts and expenditures were derived from the Annual Reports of the Secretary of the Treasury for fiscal years 1932 and 1938. State and local statistics for 1932 were obtained from Bureau of the Census, Financial Statistics of State and Local Governments, 1932. State tax and revenue statistics for 1938 were obtained from the U. S. Office of Education, U. S. Bureau of Public Roads, the Tax Policy League, and the Distilled Spirits Institute. Local tax and revenue statistics were estimated on the basis of the financial reports of a number of local units which, in 1932, accounted for more than one-third of the total local revenue in the United States. The Bureau of the Census annual reports of Financial Statistics of Cities and the comparative city tax rates, prepared annually by the Detroit Bureau of Governmental Research,

afforded a means for verifying the estimates. Data on state and local borrowings, interest, and debt retirement were derived from the Treasury Department's annual compilations of tax-exempt securities. State and local functional expenditures were initially estimated on the basis of the Bureau of the Census' reports for 1937. For the three most important categories, (1) education, (2) highways and streets, and (3) relief, welfare and social security, expenditure statistics for 1938 were obtained from other Federal departments.

For purposes of estimating total state and local expenditures, it was assumed that expenditures amounted to the sum of (1) current revenue collections, (2) depletion of general fund balances, and (3) the net excess of bond issues over bond retirements. In 1938 the Federal Government depleted its general fund balances by \$738,000,000. It was assumed that states and local governments made no important use of balances. Such changes as occurred in the balances of state and local units in the course of the fiscal year are believed to have neutralized one another.

Federal and Estimated State and Local General Government Financial Transactions, Fiscal Years Ending in 1932 and 1938

(In millions of dollars)

Notes: The amount of customs duties and taxes is calculated on the basis of reports of the Bureau of Foreign and Domestic Commerce, showing the quantity and value of merchandise imported.

1/ Figures are rounded to nearest thousand, and will not necessarily add to totals.

2/ Includes taxable sugar from the Philippine Islands.

3/ Duty-free commodities taxed under the Revenue Act of 1932 and subsequent acts.

4/ Articles dutiable under paragraph 1615 and repairs on vessels dutiable under Section 466 of the Tariff Act of 1930; the taxable copper content of dutiable articles taxed under the Revenue Act of 1932 and taxes on articles composed in chief value of manufactured sugar under the Sugar Act of 1937, which cannot be allocated to appropriate schedules. Taxes collected on other dutiable commodities under the revenue acts and the Sugar Act of 1937 are included in appropriate schedules.

**Estimated Receipts from Taxes Imposed by Various Revenue Acts on Imports
into the United States: First 11 Months, Fiscal Year 1939**

July.....	32.7	2.7	35.4	1.7	8.8	32.5	41.3	-	43.0	86.0

Note: Figures in this and four succeeding tables are rounded to nearest tenths of millions and will not necessarily add to totals.

1/ Second Deficiency Appropriation Act, fiscal year 1938, approved June 25, 1938, carried an appropriation of \$40,561,886.43, pursuant to authorization of Aug. 24, 1937, for making refund to certain States of portions of Federal employers' tax for 1936 collected under Title IX of the Social Security Act.

2/ Counter entry, deduct.

3/ Includes only expenditures from appropriations made specifically for administrative expenses relating to the Social Security and Railroad Retirement Acts. Does not include administrative expenses payable from other appropriations. The principal agencies in the latter group are the Bureau of Internal Revenue of the Treasury Department, and the Public Health Service and the Office of Education of the Federal Security Agency.

Old-Age Reserve Account

(In millions of dollars - on basis of daily Treasury statements, unrevised)

1/ Transfers from general fund were not reflected until July 1, 1937.

2/ Includes balance of appropriation available for transfers subsequent to June 30, 1937.

Cash Income and Outgo of the Treasury

(These figures are not intended to reflect the budgetary position of the Government. They will not agree with budgetary figures on receipts, expenditures and deficit such as those appearing in Daily Treasury Statements and in other tables in this Bulletin. For an explanation of the revisions made in Daily Treasury Statement figures to arrive at this cash series, see the text in February Bulletin. All figures in the table at the bottom of the page have now been revised in accordance with that explanation.)

Note: Description of revision and back figures may be found in the July bulletin, Page 20.

1/ January 1938 through April 1938, corporate average is monthly average of Saturday figures.

2/ Average of Treasury bonds not due or callable for twelve years or more.

3/ Average of twenty bonds, Jan. 1938 through Sept. 13, 1938; five bonds, Sept. 14, 1938 to date.

4/ Or the last preceding sale when there was no sale on Wednesday.

COMPARATIVE YIELDS OF AVERAGE OF ALL LONG TERM U.S. TREASURY AND AVERAGE OF HIGH GRADE CORPORATE BONDS

Yields Based on Wednesday Quotations

* Break in line indicates change in composition of Long Term Treasury average

Based on Closing Prices

Note: For callable bonds, yields are computed to and issues plotted on the earliest call date. If the bond is selling above par, the yield of trading is shown. If the bond is selling below par, the smooth curves are fitted by eye. Dollar amounts shown in descriptions of issues are in millions. Issues for which an exchange offer has been made and has expired are excluded.
